**FRIENDLY REMINDERS:**

- If storing your boat **do not fill the gas tank over ¾ full** (gas will expand in the warmer spring months and can come out the vent).
- With today's ethanol blended gas, it is very important for you to add stabilizer and run it through the engine during your last boat ride. Gas tanks should be left as full as possible when storing the boat, **(BUT NOT over ¾ full)**. Although Castaway Marina has non- ethanol gas, we still recommend adding fuel stabilizer for winter storage.
- **YOU will need to add gas before boat is winterized (we do not have dockhands present to pump gas when boats are pulled out of the lake.)**
- **YOU will need to pump out your waste system (we do not have dockhands present to pump waste tanks and will charge \$75.00 if we have to pump out the waste. A pump out is NOT included with dockage or service)**
- Please make sure all batteries are fully charged before leaving boat.
- Please remove ropes, life jackets and other items from storage compartments adjacent to engine.
- All service work must be paid in full before the boat leaves Castaway Marina
- Boats must be picked up within 10 DAYS of service being completed (\$10.00/day fee will be charged thereafter)
- Make sure to leave keys in boat (\$10.00 charge for no keys)
- Castaway assumes no responsibility for damage caused to canvas/eisenglass by removing and installing when these items are old/brittle.
